

Bhasha Bandhu Hackathon

Innovating for a Multilingual Judiciary

Theme: "बोली आपकी, समझ सबकी"

BHASHINI

**BHASHA
BANDHU**

Innovating for a Multilingual Judiciary

Supported by  Microsoft

बोली आपकी, समझ सबकी

During a recent event in Kashi, attended by a diverse group from Tamil Nadu, Prime Minister Modi delivered his speech in Hindi. Bhashini translated his speech into Tamil in real-time. This innovative application of AI technology bridged the language barrier and demonstrated its potential to revolutionize media consumption and interaction across different languages.

Prime Minister Modi's story, shared on Mann Ki Baat, inspires our hackathon theme. It underscores AI's transformative power in enhancing communication and accessibility. Our hackathon aims to build on this concept, encouraging participants to develop solutions that leverage AI to break down language barriers, foster inclusivity, and create a more interconnected world. The real-time translation showcased in Kashi is a testament to the possibilities that lie ahead.

Bhasha Bandhu Hackathon

Focus Area: Automating Judiciary Processes in the Entire Value Chain

The primary goal of the proposed hackathon, branded Bhasha Bandhu, is to develop innovative solutions that enhance and automate judiciary processes. The focus will be on improving efficiency, accessibility, and transparency across the judiciary value chain, from witness disposition to judgment delivery. This hackathon aims to unite developers to create applications that support the judiciary in providing timely and fair justice while ensuring language inclusivity and ease of access for all citizens.

Timelines and Execution:

- **Registration Open:** 23rd January 2025
- **Idea Submission Open:** 25th January 2025
- **Announcement of Shortlisted Ideas:** 28th February 2025
- **Offline Hackathon day:** 22nd March 2025
- **Final Presentations and Judging:** 22nd March 2025
- **Prize distribution:** 22nd March 2025

Branding: Bhasha Bandhu

Theme: "बोली आपकी, समझ सबकी"

Together in Words, Together in Understanding

Hackathon Partners:

- Ministry of Law and Justice
- Bar Council of India
- National Law Universities
- Developer Community Engagement: Engage with the Azure Developer Community and integrate them with law universities and other academic institutions.
- Industry Collaboration: With support from the Bhashini team, plan to collaborate with industry associations like CII, FICCI, or SHM for broader reach and impact.

Breaking Language Barriers Across India

Speak Your Language. All of India Understands!

Problem Statements:

a. Software/App enhancing Awareness of Mediation in Indian Communities and Institutions

Synopsis:

We seek innovative solutions that leverage the BHASHINI API and functionalities to create widespread awareness about mediation. The goal is to educate citizens, legal professionals, and organizations about the benefits of mediation, encourage its adoption, and reduce the burden on Indian courts.

Expected Solution:

1. Utilize the BHASHINI API to develop chatbots, interactive guides, or virtual assistants that provide accurate information about mediation.
2. Design user-friendly platforms that explain the mediation process, address common misconceptions, and connect users with trained mediators.
3. Community Forums: Enable users to share experiences, ask questions, and connect with trained mediators.
4. Explore gamification or storytelling techniques to engage users and make mediation concepts accessible.
5. The solution should be able to compile downloadable guides, case studies, and relevant legal documents in regional languages.

b. Empowering Citizens: Simplified Legal Application Filing through Regional Speech

Synopsis:

Solution should be a user-friendly system that allows citizens to fill out legal application forms accurately and efficiently. The solution should be accessible, multilingual, and capable of understanding regional dialects.

Expected Solution:

Solutions should combine regional speech recognition and the BHASHINI API to create an intuitive application. This application should guide users through legal application forms, validate inputs, provide contextual legal information, and allow electronic submission with tracking features. Moreover, while designing the solution, try and integrate the below mentioned in the prototype:

1. An intuitive interface that guides users step-by-step through the application form.
2. It should provide clear instructions and tooltips in multiple languages.
3. Should have a legal knowledge repository that explains the purpose of each form field.
4. Should provide contextual information about legal terminology and requirements.
5. Ensure that users understand the implications of their responses in regional language speech.
6. Enable users to submit completed applications electronically using speech.
7. Implement tracking features to notify users of their application status.

Problem Statements:

c. Promoting Legal Literacy Across Communities

Synopsis:

Propose solutions that leverage existing platforms to create a comprehensive legal literacy ecosystem. The focus is on reaching diverse audiences regardless of language or background.

Expected Solution:

Participants should propose solutions that encompass the following aspects:

1. Develop a platform offering legal information in various languages.
2. Ensure accurate translation and localization.
3. Create bite-sized modules with quizzes and interactive scenarios.
4. Tailor content for different user profiles (students, professionals, senior citizens).
5. Facilitate connections between users and legal aid services.
6. Provide real-time updates on legal aid availability.

d. Enhancing Awareness and Accessibility of Digital Legal Platforms in Rural and Underserved Areas

Synopsis:

Propose a solution for building knowledge graphs and a vector database that integrates all legal provisions, both old and new, into a comprehensive pool of information. This solution should be accessible to all with precision and address the last-mile challenge.

Expected Solution:

Participants should propose solutions that encompass the following aspects:

1. Develop a platform offering legal aid in all regional languages.
2. Create a robust knowledge graph and vector database that integrates all legal provisions, making it easy to access and understand.
3. Ensure accurate translation and localization.
4. Create bite-sized modules with quizzes and interactive scenarios.
5. Tailor content for different user profiles (students, professionals, senior citizens, gender based).
6. Facilitate connections between users and legal aid services.
7. Provide real-time updates on legal aid availability.

Recognition and Rewards

1. Certificates and Mentorship:

- All participants will receive certificates of participation.
- Winners will receive personalized mentorship from Microsoft and Bhashini experts, providing valuable guidance and technical insights.

2. Potential Collaboration:

- Winning solutions will be considered for implementation in high-impact government projects. This provides participants with unparalleled exposure and the chance to contribute significantly to national initiatives.

3. Industry and Academic Recognition:

- Acknowledgement in major industry publications, academic journals, and PR mentions.
- Invitations to present their solutions at future events

4. Hackathon Champion Title:

- Official title of "Bhasha Bandhu Hackathon Champion," which participants can proudly display on their professional profiles

5. Networking Opportunities:

- Exclusive access to a virtual networking event with top executives from Microsoft and Bhashini, providing invaluable industry connections.

6. Professional Development:

- Free access to workshops and webinars on the latest technologies and career development skills.

7. Media Coverage:

- Press releases and media coverage for winners in leading tech and business news outlets.
- Highlighting success stories on Microsoft's official channels and social media platforms.

Cash Prizes:

- 1,00,000/- INR* Winner For Each Theme
- 50,000/- INR Runner Up For Each Theme
